**ENVIRONMENTAL COMPLIANCE CALENDAR**  
 1 AUGUST 1999 THROUGH 31 OCTOBER 1999

DATE	LAW(S)	REQUIREMENT
<b>AUG 1</b>	CAA	Facilities subject to new source performance standards under 40 CFR 60, Subpart Eb and are located within a small or large municipal waste combustor plant that meets the criteria specified under 40 CFR 60.59b(h) must file a semiannual report. <i>Federal Register Notice 60 FR 65436</i>
<b>AUG 15</b>	CAA	Sources subject to surface coating emission limitations described under 40 CFR 63, Subpart II, for shipbuilding and ship repair operations must make prescribed volume determinations for affected coatings. <i>Federal Register Notice 60 FR 64339-40; Regulation 40 CFR 63.785(c)(2)(iii)-(vi) and (c)(3)(iv)-(vi)</i>
<b>AUG 15</b>	CAA	An existing source subject to surface coating emission limitations described under 40 CFR 63, Subpart II, for shipbuilding and ship repair operations must file a semiannual report. <i>Federal Register Notice 60 FR 64343; Regulation 40 CFR 63.788(c)</i>
<b>AUG 30</b>	TSCA	Individuals not certified pursuant to 40 CFR 745.226(a)(ii)(2) are prohibited from conducting lead-based paint activities identified under 40 CFR 745.227. Individuals who received training in such activities between 1 October 1990 and 1 March 1999 must apply for certification under the alternative procedures outlined under 40 CFR 745.226(d)(1)(i) through (ii). Individuals with previous training must apply pursuant to procedures specified under 40 CFR 745.226(a), (b), or (c). <i>Federal Register Notice 61 FR 45813; Regulation 40 CFR 745.226(a)(5), 745.226(d)</i>
<b>AUG 30</b>	TSCA	Except as otherwise specified, polychlorinated biphenyls may be used in air compressor systems at concentrations greater than 50 parts per million provided the conditions specified under 40 CFR 761.30(s)(2) are met within one year of the date of discovery of such PCBs in the air compressor system, or by this date, whichever is later. <i>Federal Register Notice 63 FR 35442</i>
<b>SEPT 15</b>	CAA	Sources subject to surface coating emission limitations for shipbuilding and ship repair operations must make prescribed volume determinations for affected coatings. <i>Federal Register Notice 60 FR 64339-40; Regulation 40 CFR 63.785(c)(2)(iii)-(vi) and (c)(3)(iv)-(vi)</i>
<b>SEPT 15</b>	CAA	The reduced Reid vapor pressure standards for commercial gasoline expire until the following summer season commences. <i>Federal Register Notice 56 FR 64710; Regulation 40 CFR 80.27(a)(2)</i>

SEPT 15 CAA	Reformulated gasoline standards expire until the following summer season commences. <i>Federal Register Notice 59 FR 7856 and 36965; Regulation 40 CFR 80.78(a)(1)(v)</i>
SEPT 19 CAA	Marine tank vessel loading operations that are subject to hazardous air pollutant emission standards set forth under 40 CFR 63, Subpart Y, must comply with maximum achievable control technology standards. <i>Federal Register Notice 60 FR 48400; Regulation 40 CFR 63.560(e)(1)(i)</i>
OCT 10 SDWA	Unfiltered public water systems are required to submit a report that summarizes compliance during the previous fiscal year with all watershed control program requirements specified in 40 CFR 141.71(b)(2) and on-site inspections conducted pursuant to 40 CFR 141.71(b)(3). <i>Regulation 40 CFR 141.75(a)(3)-(4)</i>
OCT 15 CAA	Sources subject to surface coating emission limitations described under 40 CFR 63, Subpart II, for shipbuilding and ship repair operations must make prescribed volume determinations for affected coatings. <i>Federal Register Notice 60 FR 64339-40; Regulation 40 CFR 63.785(c)(2)(iii)-(vi) and (c)(3)(iv)-(vi)</i>
OCT 15 EPCRA	Facilities subject to toxic chemical release reporting requirements under 40 CFR 372 must submit revisions to Form R data previously reported if the owner or operator wishes publicly available data to reflect those revisions. <i>Federal Register Notice 56 FR 48796 and 59 FR 41444</i>
